# Elekta ONE® | OIS powered by MOSAIQ®
Advanced radiation oncology care

Simplify complex oncology care

Oncology care is increasingly complex, involving different investigations, therapies and professionals across multiple departments. Every patient journey is different.

Streamlined, coordinated and effective cancer patient care depends on informed teams, good communication and smooth workflows. Elekta ONE OIS is a powerful software solution that meets this need by becoming the beating heart of your oncology operations.

Established on a strong heritage of oncology informatics expertise, Elekta ONE OIS leads the field in oncology workflow and information management. It harnesses unprecedented levels of automation, integration and standardization to simplify the complexity of oncology care and to enhance overall efficiency, accuracy, consistency and performance throughout your organization.

Elekta ONE OIS gives multidisciplinary oncology care teams immediate access and insight into complete, real-time cancer patient information as they progress along their entire care journey. It helps to coordinate care, streamline workflows and improve communication between colleagues–empowering you to provide truly integrated, patient-centered oncology care for all your patients.
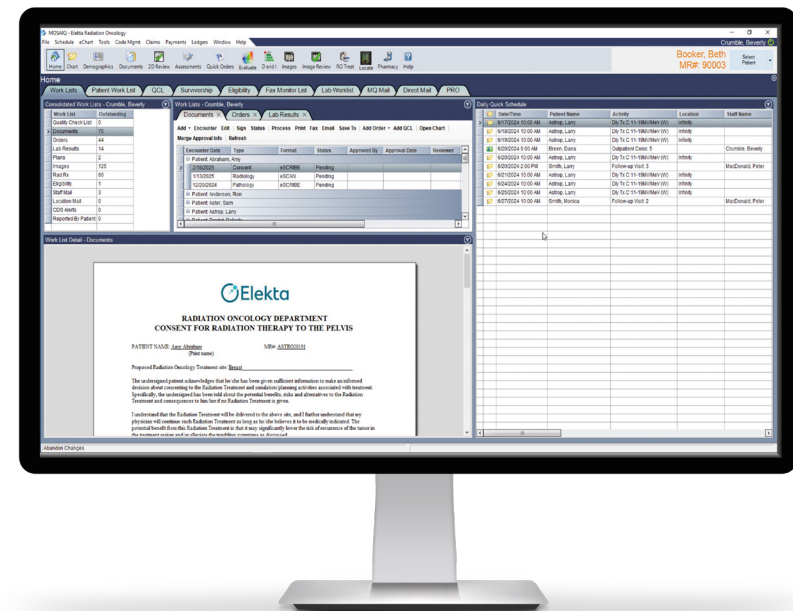

Elekta ONE OIS for radiation oncology care

Elekta ONE OIS is a modern, open and scalable software solution that provides comprehensive image, data and workflow management—with advanced automation, streamlined user interfaces and intuitive, task-driven workstreams to improve and advance radiation therapy processes.

Why Elekta ONE OIS for radiation oncology care?

- Provide end-to-end patient visibility to the right staff at the right time

- Connect colleagues and synchronize care decisions

- Improve workflows and practice efficiencies to ensure high quality patient care

- Increase standardization and consistency of care across your organization

- Customize workspaces for faster task completion

- Connect with virtually any treatment planning system or delivery device

Informed teams are empowered teams

Elekta ONE OIS is a complete patient information management system that centralizes oncology patient data into a single user interface, accessible by multidisciplinary teams across multiple locations. It empowers every person on the team by ensuring they have instant access to the complete, accurate, real-time information they need as they consult patients, complete tasks and make important clinical decisions.
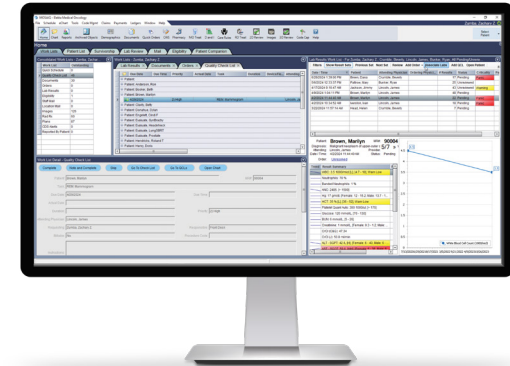

Timely and accurate patient charting

- Achieve seamless data integration throughout your organization
- Maintain a holistic view of patient care
- Enable instant, secure access to real-time patient information
- View treatment summaries and patient progress easily
- Improve communication and coordination across teams to synchronize care decisions

Patient safety assurance

- Enhance patient safety with quality checklists, patient assessments and multiple patient identification and verification options
- Help patients to move fluidly around your facility, with their complete treatment information collated in one place
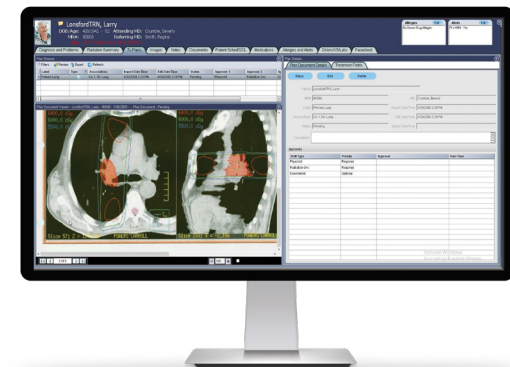

Effortless administration

- Centralize department scheduling for optimal efficiency
- Manage resources and coordinate care
- Achieve fast, accurate reimbursement with oncology-specific code capture
- Send comprehensive reports and required submissions with ease
- Experience connectivity with hospital information, diagnostic, billing and other third-party systems
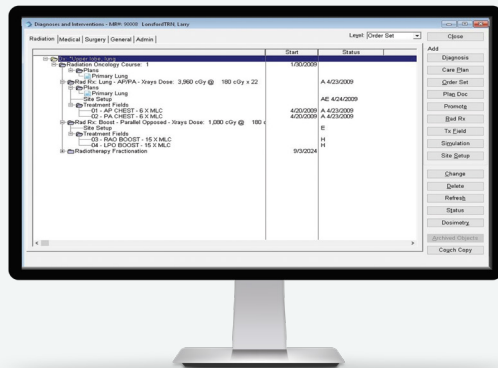

Home Page

View summary of daily tasks such as scheduled activities, worklists and information critical to your role and customized to each role in the cancer center.

RO Patient Chart

Display detailed patient chart with customizable views–and full details are just a click away.

Define and coordinate complex cancer care pathways throughout the entire patient journey
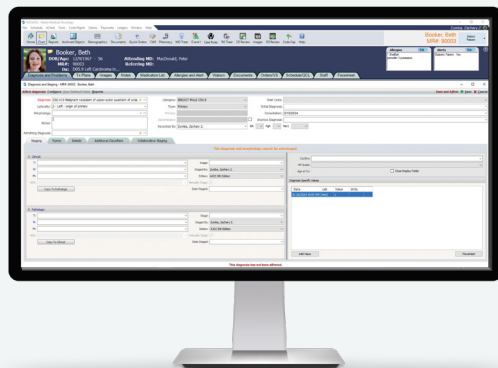

RO Diagnosis and Intervention

Visualize the full treatment components—diagnosis, treatment plans, treatment prescriptions, and the dose tracking configuration—conveniently on one screen during treatment chart preparation.
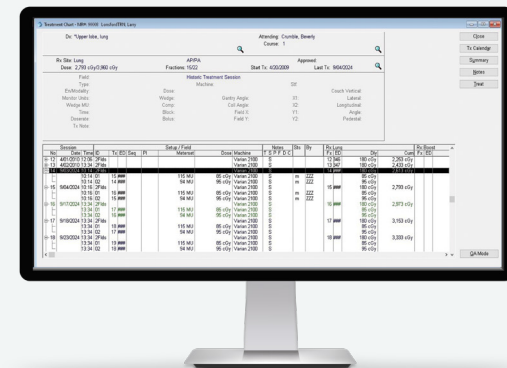

RO Safety Features

Right site, right dose, right technique: highly visible safety and hardware verification features ensure patients are prepped appropriately and procedures run smoothly.

Diagnosis and Staging

Easily record diagnosis codes to facilitate chart documentation, treatment and reimbursement. Cancer staging is recorded from oncology specific, standards-based menus.

Radiation Chart

Plan session sequences ahead of time to optimize runtime and utilize color coding to identify past, present, and future treatments.

Work faster and smarter

Reduce user interactions dramatically to speed up and enhance your daily workflows

Elekta ONE OIS provides the intelligent automation you need to enhance your productivity and streamline your clinical workflows. It will help you work more efficiently so you can reduce delays and get valuable time back in your day.

Enhanced user efficiency

- Access the data you need without leaving your desk

- Reduce user interactions and stay on task

- Accomplish more in less time and fewer clicks

- Power through routine tasks intuitively

Smart customizable workspaces

- Create a personalized workspace to display the exact information and tools you need

- Use templates to standardize care according to your center's unique protocols and processes

- Stay on task with smart, automated workflows and task-specific tools

Impact your organization

Elekta ONE OIS is a rich resource of data that can be used to unlock insights to increase practice efficiency, financial performance and clinical quality.

Leverage your data

- Capture evidence-based medicine for more informed decision making

- Harness robust data to achieve your clinical, financial and governance objectives

Standardize care

- Improve communication and achieve coherent reporting across departments

- Configure workflows and templates to keep your organization aligned

- Increase adherence to department protocols

Future-proof your practice

- Enhance patient safety with quality checklists, patient assessments and multiple patient identification and verification options

- Help patients to move fluidly around your facility, with their complete treatment information collated in one place

Quality assurance

Elekta ONE OIS provides the quality assurance you need to ensure accurate, efficient and reproducible patient care through continuous verification and recording of treatment parameters.

- Perform essential pretreatment checks, including patient identification and positioning, site setup, treatment accessory verification, daily and cumulative dose

- Verify treatment delivery parameters and record both data and images in the patient record

- Ensure efficient and reproducible patient setup with site verification enhancements

- Automatically apply daily positional shifts and registration results for faster, more efficient table moves

- Update daily patient setup shifts with trend analysis to remove systematic errors and ensure positioning accuracy

Elekta ONE OIS
for particle therapy

Elekta ONE OIS offers unique device-centric workflow efficiencies and seamless interoperability for streamlined particle therapy treatments.

Compatibility offered for all particle therapy machines

Faster, easier charting and patient preparation

Single-click transfer of plans from Elekta ONE Planning powered by MIM

Rapid delivery of complex, multi-field treatments

Reduced time-on-table for patients

Elekta ONE

Elekta ONE provides a unified software experience designed to help you keep pace with fast changing technology—and do more for your patients.

Embrace a seamless user experience

Free up time for what's important

Connect anytime, anywhere

Deliver quality care with ease

Learn from every patient

Enable unique patient journeys

Next generation interoperability

Elekta ONE OIS is an open system that connects to the hospital enterprise via industry standard interfaces.

Elekta is also excited to continue innovation in interoperability by adding FHIR to its existing framework. Elekta's FHIR Framework will allow third-party developers to build clinician and patient-facing applications using Fast Healthcare Interoperability Resources (FHIR).

FHIR API   **21CC Compliance**   **ONC Certification**   **Developer Registration**   **Documentation**

Elekta ONE | Professional Services

Benefit from our rich implementation experience and software expertise throughout every step of your journey with us.

- Fast, smooth transition

- Optimal software performance

- Workflow efficiencies

- Lower operational costs

- Rapid return on investment

Migration to cloud-based software
Key to reducing carbon emissions for software solutions

Elekta Axis Cloud security

- Multilayer threat protection

- Automated security detection

- Built-in system compliance

- Optimal software performance

- Operational continuity

- Effective budgeting

We contribute to a sustainable future

Elekta is committed to building a sustainable future globally while realizing a vision of a world where everyone has access to the best cancer care.
